

Mothers' Milk Bank of Tennessee received a \$45,000 grant from the HARDY Fund of the Community Foundation of Middle Tennessee to support its Compassionate Care Fund, which will now be named **the Rosie Fund** in honor of Michael and Caleigh Hardy's daughter, Rosie.

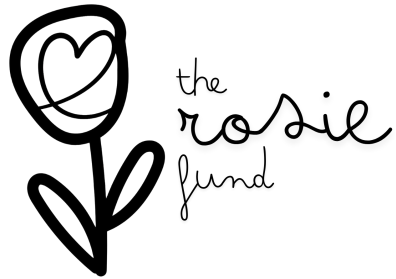

All requests for pasteurized donor milk and financial assistance are evaluated on an individual basis. Since we rely on the generosity of volunteer milk donors, we cannot guarantee availability of pasteurized donor human milk.

Who can receive pasteurized donor human milk?

Both infants in the hospital and those receiving care at home can benefit from donor milk. In the neonatal intensive care unit (NICU), donor milk use is linked to reduced rates of serious health complications and increased rates of exclusive maternal breastfeeding upon discharge. For babies at home, donor milk is meant to serve as a temporary source of supplementation while mom's own milk is insufficient or not available. Donor milk is a source of support to a mother until she has a sufficient supply for her baby. Sometimes this takes a few days, and sometimes a longer bridge is needed.

How many bottles of milk can I receive?

Qualifying households may receive up to 40 bottles per baby.

Income Eligibility

Assistance levels are determined by your household's annual income. The dollar amounts provided are thresholds. Proof of income will be required.
